

SUSAN M. BERNARD

Full-Stack Developer

Atlanta, GA | 470.576.3189 | smb@smbernard.tech | linkedin.com/in/SmBernardTech | github.com/SmBernardTech

SUMMARY

Full-stack developer with 9 years of experience building web applications in Vue, TypeScript, FastAPI, and PostgreSQL. Strong focus on UX/UI design and accessibility, delivering interfaces that meet or exceed WCAG/ADA standards. Background in psychology, healthcare, and education brings a practical understanding of how people actually interact with software. Experienced with REST APIs, CI/CD pipelines, and AI-assisted development workflows.

SKILLS

Programming: JavaScript, TypeScript, Python, Java

Frameworks & Libraries: Vue, Quasar, FastAPI, Node.js, Bootstrap

Databases: PostgreSQL, MongoDB, SQLite, PGAdmin

Tools & DevOps: Git, GitHub, GitHub Actions, Docker, Jira, Trello, VS Code

AI & Automation: Claude AI, Claude Code, agentic development workflows

Design & Prototyping: Figma, Lucidchart, Miro, Inkscape

Methodologies: Agile, SDLC, UML, WCAG/ADA accessibility standards

EXPERIENCE

Full-Stack Developer / Front-End Developer

AgriLynk | Remote (Contract) | 2022 - Present

- Build and maintain a full-stack IoT management platform in Vue/Quasar and FastAPI for agricultural station monitoring, sensor data, and irrigation control.
- Design and implement REST API endpoints with Pydantic schemas, data models, and database migrations using Alembic.
- Implement role-based access control, multi-tenant data scoping, soft-delete/restore, and CI/CD pipelines via GitHub Actions.
- Build dynamic forms and multi-step wizards with conditional field visibility, real-time validation, and interdependent field updates.
- Create reusable Vue 3 components and composables, and migrate legacy code to TypeScript to shrink bundle size and improve clarity.
- Build custom agentic workflows with Claude AI for planning, code review, and documentation.

Full-Stack Developer / Web Designer

Fine Technology Solutions | Local & Remote | 2017 - Present

- Translate client requirements into user flows, user stories, wireframes, and prototypes.
- Build responsive, accessible web applications in Vue.js, Quasar, and Bootstrap that meet or exceed ADA/WCAG standards.
- Manage project administration in Jira and Trello including ticket creation, sprint planning, and backlog grooming.
- Coordinate development efforts across teams to maintain codebase consistency and adherence to standards.

Hospital Corpsman / Psychiatric Technician

United States Navy | Active Duty

Neuro-psychiatric care and clinic administration. Good Conduct Medal, Joint Meritorious Unit Award, Humanitarian Service Medal (Operation Sea Signal), and National Defense Service Medal.

EDUCATION

Master of Science in Software Development | Boston University | 2018 | GPA 3.57

Bachelor of Science in Communication Disorders & Deaf Education | Utah State University | 2014 | GPA 3.94

Bachelor of Arts in Psychology | University of West Georgia Honors College | 2006 | GPA 3.7 | Cum Laude
